

I am writing to give testimony to the contribution KLOVE Radio Station makes to our community. It is the only station in our listening area that is family-friendly--I never have to worry about program content or double entendre containing remarks. It provides great, wholesome entertainment, as well as informing programs on marital issues, financial advice, bringing up children, etc. There are also announcements of good, wholesome, family-oriented entertainment events within our community. All of this is provided, commercial free, which is a wonderful format. I feel this community would be losing a wonderful source of entertainment and encouragement if it were to be replaced by any other format.
